Children Interactive Classification						
Ineractive Floor	Make the ordinary ground entertaining by projector	1 camera sensor, Infrared lamp,usb cable 2 Interactive software, 20 different Games which include 3D Games	1 projector and its bracket 2 Windows compute 3 hdmi cable 4 speaker optional	400		only for single screen,size is less than 4*3m.if you want larger,multiple projectors will be required, and the price will be recalculated
Ineractive Ball Hitting	Make the common wall into a wall of entertainment, and generally children's park matching	1 camera sensor, Infrared laser*2,usb cable 2 Interactive software includes 30pcs 3D wall Games	1 projector and its bracket 2 Windows computer 3 hdmi cable 4 speaker optional	600		only for single screen,size is less than 4*3m.if you want larger,multiple projectors will be required, and the price will be recalculated
Ineractive sandbox 1 game mode	projection picture displays the surface of the ocean,the continental shelf, the coast, the land,the mountains and other terrain effects.all effects are gradually presented as the height of the sand pile increases.	1 kinectV2 sensor 2 remote control mini PC 3 one game effect	1 projector and its bracket 2 hdmi cable 3 speaker optional 4 sand table and its white sand	1000		display area: 1.6 * 1.2M The story height not be less than 2.8 meters
Ineractive sandbox 11 game mode All in one	projection picture displays the surface of the ocean,the continental shelf, the coast, the land,the mountains and other terrain effects.all effects are gradually presented as the height of the sand pile increases.	1 kinectV2 sensor 2 remote control mini PC 3 11 game effect 4 DLP projector and its bracket 5 hdmi cable 6 speaker 7 sand table and its white sand 8 game props	none	5000		ALL in one Game Name: "The magic prairie", "treasure hunters", "beach paradise", "spring, summer, autumn and winter", "happy fishing", "magical traffic", "fantasy sand sea", "dreamland", "fantasy snow mountain", "cultural relics treasure", "jade treasure"
Ineractive Beach	Projection Beach Interactive is an interactive game in which the physical sand pool combines multimedia interactive technologies. The game is divided into fishing and	1 camera sensor, Infrared lamp,usb cable 2 four fish pans 3 Interactive software include four 3D game and 200 ifloor games	1 projector and its bracket 2 Windows computer 3 hdmi cable 4 speaker optional	1000		only for single screen,size is less than 4*3m.if you want larger,multiple projectors will be required, and the price will be recalculated
Virtual interactive flow wall Touch Mode	Slide your hand up the virtual water screen to create a virtual channel that changes the direction and volume of water.The experiencer can also make full use of various props to create a fantasy "water" world.	AR touch flow game	Infrared touch screen all in one pc	1000		Had better choose 40 inches above touch screen There are two versions of the game, one is the cartoon version, the other is the puzzle version, choose one of them
Motion Sensing Game: waterfall	Slide your hand up the virtual water screen to create a virtual channel that changes the direction and volume of water.The experiencer can also make full use of various props to create a fantasy "water" world.	1 AR waterfall game 2 kinect V2 sensor	1 display device,such as projector,LED or monitor 2 Host computer	1500		The display screen should be no more than 6 meters and can sense 4 people at the same time
ar musical piano	When the notes falls to the corresponding position, pressing the piano key in the corresponding position to play a complete song	1 8 pcs piano button 2 ar musical piano game 3 Piano keyboard connection accessories	1 projector or monitor or LED screen 2 Windows computer 3 cable 4 speaker optional	1700		Display devices are unlimited and we can also support more piano buttons.
Interactive piano keys	Each piano button represents a different sound and color, and you can also play a dance according to the rhythm of the step	1 8 pcs piano button 1000*300*60MM,electric power 35W	none	1040		\$130 per button

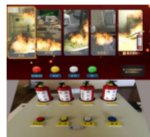

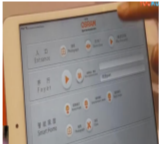

ar musical wall	The sleeping instrument on the wallpaper waits to be awakened. When the finger touches it, it animates immediately	1 150-inch wallpaper optional 2 radar Sensor 3 music game Grey or green themes are available	1 projector 2 Windows computer 3 cable 4 speaker optional	1000		only for single screen, size is less than 4*3m. if you want larger, multiple projectors will be required, and the price will be recalculated
Interactive drawing	children can doodle their favorite colors for small animals, after the painting of the children's creation of small animals is given "life" fresh appeared in the scene, really let the children become magic brush ma liang	1 scanner 2 radar sensor 3 interactive software 3 6 pcs theme game Sketch aquarium Sketch animals Sketch Halloween Sketch the world of ice and snow Dinosaur world Sketch town	1 projector or LED screen 2 Windows computer 3 cable 4 speaker optional 5 Infrared touch screen all in one pc optional 6 IPAD optional, child can draw animals on IPAD	1500		only for single screen, size is less than 4*3m. if you want larger, multiple projectors will be required, and the price will be recalculated
Interactive Slide	"Colorful Slide" is an accessory toy developed for slides. It uses interactive projection technology to project the picture on a slide.	1 camera sensor, Infrared lamp, usb cable 2 Interactive software, 30pcs 3D Games 3 Projection correction software	1 projector and its bracket 2 Windows compute 3 hdmi cable 4 speaker optional	1000		The standard size is 3 * 2.3 m. if you want larger, multiple projectors will be required, and the price will be recalculated
Interactive Trampoline	Projecting a game onto a trampoline surface using a projector, taking motion capture technology as the center	1 camera sensor, Infrared lamp, usb cable 2 Interactive software, 5 pcs 3D Games custom made for Trampoline, the other 200 pcs game for present 3 Projection correction software	1 projector and its bracket 2 Windows compute 3 hdmi cable 4 speaker optional	1000		only for single screen, size is less than 4*3m. if you want larger, multiple projectors will be required, and the price will be recalculated
AR iron man	experience transformation into a iron man warrior, then take photos, after that Experiencer can defeat the monsters	1 kinect2 camera sensor 2 Iran Man motion sensing game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The distance from the sensor is no more than 4 meters, the game can support two people to play at the same time, the display screen size is no more than 5 meters
Animals of Flowers, Symbiotic Lives	The body of the animal is covered with flowers. The flowers are born on the animal, bloom and fall off. When they touch the animal with their hands, the flowers will bloom and scatter	1 radar Sensor 1 set 2 interactive software 3 Animals of Flowers effect	1 projector 2 fusion compute 3 hdmi cable 4 speaker optional	2000		only for single screen, size is less than 4*3m. if you want larger, multiple projectors will be required, and the price will be recalculated
hieroglyph	This hieroglyph, when touching the text on the screen, will represent the physical image of the zodiac will appear, making hieroglyphics materialized	1 radar Sensor 1 set 2 interactive software 3 Animals of Flowers effect	1 projector 2 fusion compute 3 hdmi cable 4 speaker optional	2000		only for single screen, size is less than 4*3m. if you want larger, multiple projectors will be required, and the price will be recalculated
Wall touch blessing interactive game	Touch the wall fireworks will be set off, the god of wealth will scatter gold COINS and gift bags, there are two games, very suitable for the New Year festival festive time	1 radar Sensor 1 set 2 interactive software 3 Happy salute and meet the god of wealth 2 games	1 projector 2 fusion compute 3 hdmi cable 4 speaker optional	2000		only for single screen, size is less than 4*3m. if you want larger, multiple projectors will be required, and the price will be recalculated
Spelling English word game	Students can touch the letters on the wall to form a complete English word. The teacher can input any word and explain the picture by himself	1 radar Sensor 2 interactive software 3 Interactive games for learning English	1 projector or LED screen 2 windows compute 3 hdmi cable 4 speaker optional	1000		only for single screen, size is less than 4*3m. if you want larger, multiple projectors will be required, and the price will be recalculated
interactive teaching games	10 pcs simple games, there are wall touch version and motion sensing version, choose different sensors can correspond to different versions	1 Sensor radar / kinectV2 2 interactive software 3 ten pcs games for each version	1 projector or LED screen 2 windows compute 3 hdmi cable 4 speaker optional	1200		The display screen should be no more than 5 meters and can sense 4 people at the same time

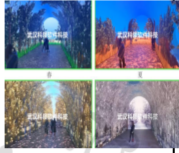

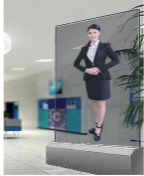

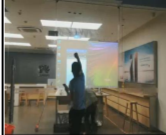

Sports

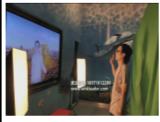

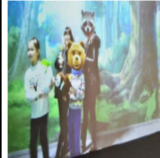

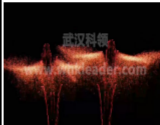

Playground FootBoall	Make the ordinary ground entertaining by projector	1 camera sensor or radar sensor 2 Interactive software, In addition to the football game, there are 230 other games given as present	1 projector and its bracket 2 Windows compute 3 hdmi cable 4 speaker optional	300/1100		only for single screen,size is less than 4*3m.if you want larger,radar sensor and multiple projectors will be required, and the price will be recalculated
penalty kick projection Game physical football	Let the wall projection on the goal and goalkeeper, with football to shoot the wall door	1 camera sensor with 2 pcs laser 2 Interactive software, 3 point sphere Game	1 projector and its bracket 2 Windows compute 3 hdmi cable 4 speaker optional	1000		only for single screen,size is less than 4*3m.if you want larger,radar sensor and multiple projectors will be required, and the price will be recalculated
penalty kick motion sensing game	The power is controlled by the power bar on the right, the Angle is controlled by the direction the person faces, and the kick action controls the launch	1 kinect2 camera sensor 2 Iran Man motion sensing game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		only for single screen,size is less than 4*3m,Multiple projection blended is not supported
football teching game motion sensing game	The power is controlled by the power bar on the right, the Angle is controlled by the direction the person faces, and the kick action controls the launch	1 kinect2 camera sensor 2 Iran Man motion sensing game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	2000		for single screen,size is less than 5m,Multiple projection blended is not supported
Archery Virtual motion sense interactive game	When the experiercer enters the scene, the bow will be automatically loaded into the left hand, and the arrow will be automatically loaded into the right hand.The experiercer can launch the arrow automatically after making the archery action	1 kinect2 camera sensor 2 Archery motion sensing game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		for single screen,size is less than 5m,2 projection blended is supported! Items and game background can be changed
Archery projection Physical interactive game	Real bows and arrows are used for shooting, which can be played by three people at the same time. projection imaging technology is adopted for the wall part, which is different from the traditional achery path and	1 camera sensor, Infrared laser*2,usb cable 2 Archery game, including two modes of entertainment and competition 3 bow 3 pcs and achery 30 pcs	1 projector 2 Host compute 3 hdmi cable 4 speaker optional	1300		only for single screen,size is less than 4*3m.if you want larger,radar sensor and multiple projectors will be required, and the price will be recalculated
Tennis and squash projection Physical interactive game	Experiercers can use real Tennis to hit virtual patterns in the projection interactive area, making sports more fun	1 camera sensor, Infrared laser*2,usb cable 2 interactive software 3 tennis game has 3 scence	1 projector 2 Host compute 3 hdmi cable 4 speaker optional	1000		only for single screen,size is less than 4*3m.if you want larger,radar sensor and multiple projectors will be required, and the price will be recalculated
Basketball projection Physical interactive game	Experiercers can shoot with real basketball in the projection interactive area, score points if they make a shot, and play a game with two people, which makes sports more fun	1 camera sensor, Infrared laser*2,usb cable 2 interactive software 3 basketball game	1 projector 2 Host compute 3 hdmi cable 4 speaker optional	1000		only for single screen,size is less than 4*3m.if you want larger,radar sensor and multiple projectors will be required, and the price will be recalculated
Exercise motion sensing interactive games	experiercer can play games to exercise their bodies. They can exercise their balance, running, waist and boxing	1 kinect2 camera sensor 2 Balance games, running games, waist games, boxing games	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		for single screen,size is less than 5m,2 projection blended is supported! The price is for each game, not the total price of 4 games
Interactive Product						
8M radar	A sensor can identify an area within seven meters without the need for additional equipment	1 7M radar sensor with Power adapter 2 interactive software 3 50 pcs ground and 30 pcs wall games as present	1 projector or LED screen 2 windows compute 3 cable 4 speaker optional	1500		The interaction range of a sensor is within 10*5 meters. The sensor must be used indoors. The sensor is connected to the computer by network cable

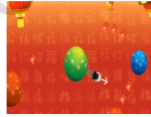

15M radar	A sensor can identify an area within fifteen meters without the need for additional equipment	1 7M radar sensor with Power adapter 2 interactive software 3 50 pcs ground and 30 pcs wall games as present	1 projector or LED screen 2 windows compute 3 cable 4 speaker optional	2200		The interaction range of a sensor is within 30*10 meters. The sensor is connected to the computer by network cable, if you want larger size, the price should recalculate.
Projection large screen fusion Soft	Multiple projectors form a seamless projection screen, it can be applied to geometric correction and mask	fusion soft Up to 16 projectors can be supported	1 projectors 2 windows compute 3 cable 4 speaker optional	500		This price is software only, not include other hardware equipment, is not the price of door-to-door service.
Interactive LED Screen	Add touch function to the LED screen	1 radar sensor 2 interactive software 3 Demo Game and Demo photo browsing software	1 LED screen 2 windows compute 3 cable 4 speaker optional	2200		This price is not the final price. The price should be recalculated according to the size of the LED screen and whether there are radians
4D glass walkway interaction	When you walk on the glass trestle, through the superposition of sensor capture and LED display effect, you suddenly find the glass under your feet broken!	1 radar sensor 1 set 2 interactive software 3 13 pcs game for LED screen which adapt to any LED screen	1 LED screen 2 windows compute 3 cable 4 speaker optional	2200		This price is not the final price. The price should be recalculated according to the size of the LED screen
Gesture recognition interaction	The interactive system detects the movements of each of fingers, such as dragging, picking and dropping 3D objects with your fist. It can also detect finger movement, click and so on	1 finger detect sensor 2 Display system which can support the rotation of 3D model, zoom in, and photo switching	1 projector or LED or monitor 2 windows compute 3 cable 4 speaker optional 5 Round bracket optional	1200		This price is not the final price. The price will be based on the interactive content you want to achieve
Object recognition	There will be different objects on the desktop, when you pick it up, it will automatically play its video, and you can use your hand to view its introduction	1 kinect2 camera sensor 2 Balance games, running games, waist games, boxing games	1 projector 2 Host compute 3 cable 4 speaker	2000		This price is not the final price. The price will be based on the interactive content you want to achieve. Projection and sensor at least 1.5 meters above the desktop
Interactive Table	Projection onto a common table to form an interactive desktop for inquiry, entertainment, etc. Projection interactive tables can support round or square desktops.	1 camera sensor, Infrared laser*4, usb cable 2 interactive software 3 some table's game and Picture&vedio display system	1 projector 2 windows compute 3 cable 4 speaker	1000		This price is not the final price. The price will be based on the interactive content you want to achieve. The projector and sensors are suspended from the top, and electricity is needed below the table
flipbook projection camera sense mode	Projected onto a model of the book, waving a hand over it, the book will automatically turn the page, the book page can also be inserted into the video playback	1 camera sensor, Infrared lamp, usb cable 2 Interactive software 3 flipbook software which can added picture yourself	1 projector 2 windows compute 3 cable 4 speaker 5 book Model	1000		The standard size of the book mold is 1.6 meters long, 1.2 meters wide, 0.9 meters at the highest point, and 45 degrees of inclination
flipbook interaction Motion sension mode	Through the projection of the book projected to the wall, people from the wall about 1.5 meters or so wave to control the projection of the book turning	1 AR waterfall game 2 kinect V2 sensor	1 projector or LED 2 windows compute 3 cable 4 speaker	1000		The display screen should be no more than 6 meters and The operating distance is between 1 m and 2.5 m.
Voice&Rotate interaction	Experiencer can speak, input their wishes into the system, and then gently blow, just said the wishes will be displayed then loop scrolling	1 The windmill game 2 windmill sensor 3 MIC	1 projector or LED 2 windows compute 3 cable 4 speaker	1000		Voice-controlled games and rotating interactive games are both customizable

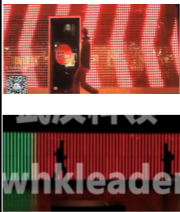

Bless interaction	The experimenter touches the lotus or guanyin with his hand, and the previous message is displayed. The experimenter can also input the blessing words through the microphone, and the guanyin and lotus will display the blessing words.	1 The guanyin& lotus game 2 radar sensor 3 MIC 4 interactive software	1 projector 2 windows compute 3 cable 4 speaker	2000		Touch and voice can be one or both We will charge based on the size of the projection and complexity of the custom game content
Mobile phone scan code interaction	Each experimenter can participate at the same time. By scanning the qr code with a mobile phone, it will enter a page that can send sentences and pictures, which will be displayed on the big screen for all to browse	1 display software running in big screen 2 H5 application which tourist input their words	1 projector or LED 2 windows compute 3 cable 4 speaker	2000		The game can be customized, all the elements can be changed to the style you want, and the price can be recalculated according to the difficulty of development
pointer interaction	When the guide picks up the laser pointer in his hand and points it at a physical object, the big display displays an introduction to the object	1 camera sensor 2 infraren pointer 3 interactive software 4 The object introduction software	1 projector or LED or monitor 2 windows compute 3 cable 4 speaker 5 Object of explanation	2000		This product can be used to play an introduction to multiple objects
Interactive quiz game	Participants can answer questions interactively through a touch screen or a projection, on one or two interactive screens.	1 infra camera sensor or radar sensor 2 interactive software 4 Q&a software	1 projector or LED or monitor 2 windows compute 3 cable 4 speaker	1000		This price is not the final price. It based on your requirements. The questions support text and graphics, which can be edited by the buyer, and analytical functions can be added to each question
Garbage classification Touch screen Mode	Garbage has been falling, a number of players for the fall of garbage categories to answer, to see who has the highest score.	1 Online garbage sorting game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 several Infrared touch screens all in one	1500		This game supports multiple touch screens online, without limiting the number of touch screens. If there is any modification, the price needs to be recalculated
Garbage classification motion sensing Mode	Players use gestures to place the falling trash in the correct bin by category.	1 kinect2 camera sensor 2 Garbage sorting game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable	1300		Garbage icons can be added and replaced, the background can be replaced. Only one player at a time. If there is any modification, the price needs to be recalculated
Garbage classification Entity and lights Mode	There is a light button on the real trash can, which can be directly clicked or stamped on by the foot to classify the garbage. The game has two options, namely 2D mode and 3D mode.	1 garbage sorting game (choose one from 2D or 3D) 2 sense floor tile lamp *4 optional 3 trash with icon * 4	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable	2000		The 3D version costs an extra 1,000 USD If there is any modification, the price needs to be recalculated
Arc-shaped projection interaction	Add touch to the arc shape projection screen	1 radar sensor * 2 2 interactive software 3 Demo Game and Demo photo browsing software	1 projector 2 Host compute 3 cable 4 speaker optional	2000		This price is not the final price. The price should be recalculated according to the size of the LED screen and whether there are radians
wallpaper interaction	There are so many static elements on the wallpaper that when the hand touches them, it seems to give them magic and make them come to life!	1 customized wallpaper 2 radar Sensor 1 set 3 fusion soft	1 projector 2 Windows computer 3 cable 4 speaker optional	1500		This is not the final price, the price will be recalculated according to the number of animations you want to customize and the projected area
Display system Motion sensing mode	When people stand in front of the screen, they can select categories, view pictures and videos by gesture, or they can wave to turn pages.	1 kinect2 camera sensor 2 Display system without portrait	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1200		All images and videos are replaceable. for single screen, size is less than 5m, 2 projection blended is supported!

AR Somatosensory interactive system	The system can play a simple sense of the game, media view, virtual photo, advertising interaction and other functions.Direct operation through the image of real person in the system.	1 kinect2 camera sensor 2 AR Somatosensory system	1 projector 2 Windows computer 3 cable 4 speaker optional	1500		All images and videos are replaceable. for single screen,size is less than 5m,2 projection blended is supported!
Simulate outfire	Four kinds of common fire extinguishers, representing different fire extinguishing materials, according to different scenarios to choose the right fire extinguisher, and open the fire valve, fire at the virtual point of fire.	1 4 fire extinguishers 2 The console with buttons 3 sensor 4 inactivesoftware 5 The 3D fire extinguishing simulation software with 30 simulation scenes	1 1 projector or monitor or LED Screen 2 Windows computer 3 cable 4 speaker optional	2500		This is not the final price, the price will be recalculated according to the number of animations you want to customize and the projected area
center control system	With the IPAD, you can control the projection, computer, lights, curtains, equipment on and off, volume, game switching, video playback pause, etc.	1 controler 2 center control console 3 center control console apps 4 mini server 5 Serial port server 6 router Ethernet switch+AP+cable	1 IPAD 2	3500		The final price is determined by how much equipment is controlled
Media display system						
Media Push interaction	Pictures or videos viewed on the touch screen can be pushed to the large screen for everyone to view	1 Media Push Software	1 projector or monitor or LED Screen 2 Infrared touch screen all in one	600		Support for multiple touch screens to form a LAN,these can push to the same large screen.The large screen can be customized to any size.
Water Flow media display wall	All the images will flow slowly like a stream of water. When the image is touched, the image will be enlarged and the surrounding images will be squeezed apart.	1 Water Flow media Software	1 projector or monitor or LED Screen 2 Infrared touch box or radar sensor	2000		Zoomed in elements can support multiple images and video browsing. This software supports arbitrary resolution, support projector, Splice Display Screen, LED screen, is a good helper for image browsing
Enterprise development display system Timeline display	List the years in which the enterprise develops important things, and click on the corresponding pictures and videos for each year. You can browse multiple pictures and play videos.	1 Histroy Wall Software	1 projector or LED Screen 2 Infrared touch box or radar sensor	1500		Zoomed in elements can support multiple images and video browsing. This software supports arbitrary resolution, support projector,Splice Display Screen, LED screen, It's mainly used to show the history of the enterprise
Honorable person exhibition	All the good people will be shown on a big screen, showing only thumbnails of their faces.When the thumbnail is clicked, the introduction and large picture of the person will pop up, as well as the corresponding deeds	outstanding persoon show Software	1 projector or LED Screen 2 Infrared touch box or radar sensor	2000		Zoomed in elements can support multiple images and video browsing. This software supports arbitrary resolution, support projector, Mosaic screen, LED screen, It is mainly used for the display of outstanding person
LOGO display System	All the company logos are lined up and displayed on the big screen, and when someone clicks on them, a description of the company appears	LOGO display system	1 projector or LED Screen 2 Infrared touch box or radar sensor	1000		This system is mainly used for the introduction of many enterprises. This software supports arbitrary resolution, support projector, Splice Display Screen, LED screen.
Digital waterfall display	The picture is like a leaf floating on a waterfall, which falls down from the top down. When you click on the picture, a more detailed description of this element will appear.	Digital waterfall display	1 projector 2 radar sensor 3 ininteractive software	3000		This system is mainly used for the introduction of many enterprises. This software supports arbitrary resolution, support projector, Splice Display Screen, LED screen.
Holographic Projection						
Holographic projection	The whole room wall ground forms a unified theme, need to rely on a number of projectors fusion and become, there are 20 holographic theme can choose 7 customized for the resolution you want	1 seven customized theme scenes 2 fusion software	1 a number of projectors 2 Host computer 3 cable optional 4 radar sensor 5 ininteractive software 6 speaker	2500		This price is not the final price, the price depends on the area of the projection and the size of the room

cave Immersive holographic interactive projection	There are blooming flowers in the whole room, the water flow of the waterfall, and the happy swimming of the big whale in the sky. Every time the experiencers go to a place, there will be special effects.	Flower sea falls, whale island	1 a number of projectors 2 Host computer 3 cable optional 4 radar sensor 5 ineractive software 6 speaker	2000		This price is not the final price, the price depends on the area of the projection and the size of the room
whale island	1. Initially, there will be multiple colorful whales swimming in the screen, and the whales on the ground will have a flashing light effect, showing a picture of a fantasy ocean. 2. When the experienter touches the wall and walks through the place, there will be scattered flowers and shadows. The place where the experienter touches will continue to have colorful light and shadow interaction. 3. When the experienter stens on the animal walking	whale island	1 a number of projectors 2 Host computer 3 cable optional 4 radar sensor 5 ineractive software 6 speaker	1200		This price is not the final price, the price depends on the area of the projection and the size of the room
The time tunnel	In the time tunnel created by LED screen,you can visually Infinite extension feeling, you can experience the change of the seasons, there are thriller, ocean, romantic scene to provide.	1 5 theme games customized 2 radar sensor 3 interactive software	1 LES screen & Video processor 2 Host computer 3 cable optional 4 speaker	4000		This price is not the final price, the price depends on the area of LED.
Interaction waves	Walking on the long virtual beach, listening to the sound of waves, each step has footprints on the beach, as if and real.	1 15M radar sensor with Power adapter 2 interactive software 3 There are 30 pcs other games besides wave games	1 projector or LED screen 2 windows compute 3 cable 4 speaker optional	2500		The interaction range of a sensor is within 30*10 meters. The sensor is connected to the computer by network cable,if you want larger size,the price should recalculate.
Virtual greeters	After sensing the visitors, the video will be played automatically, and the welcoming figures will be displayed automatically for explanation	1 infrared sensor 2 virtual interactive play software 3 fusion software	1 projector or splicing screen 2 windows compute 3 cable 4 speaker 5 Human explanation video 6 Glass and Hanger	550		In addition to not including the price of hardware, we also need to make videos, which are generally 2 minutes long and cost about 2800USD
Interactive touch glass	projected picture onto the glass with Projection Film, in addition to the sensor, so the ordinary glass can carry the picture, and can touch.query display advertising can be used!	1 camera sensor, Infrared laser*4,usb cable 2 Interactive software 3 Picture display system	1 projector 2 windows compute 3 cable 4 speaker 5 Projection Film 6 Custom software	900		only for single screen,size is less than 4*3m.if you want larger,multiple projectors will be required, and the price will be recalculated
5D cave immersive projection	Each pixel of the wall and the ground is seamlessly connected to form a perfect 3D effect. Each wall and the ground can be touched, and in specific scenarios, lighting, vibration and other sensory effects will be added to form a true 5D holographic projection	1 customized video game 2 fusion software 3 radar 4 interactive software	1 a number of projectors 2 Host computer 3 cable optional 4 speaker	10000		This price is not the final price, the hardware price depends on the area of the projection and the size of the room.The cost of the software depends on the time-length and difficulty of customizing video
Interactive taking photo						
real-time matting kinect mode	The Kinect camera can perform keying image with or without a green background, but it works better with a green background than with no green background.Players can also achieve photography, recording video and other functions.	1 kinect2 camera sensor 2 Somatosensory removing background game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional 5 Green background cloth	1300		Kinect mode requires low background lighting and is easy to install.Background players can be replaced by themselves, and after taking photos will generate a qr code, the phone can be downloaded by scanning the code.

real-time matting digital camera mode	The camera can take a picture of the person more clearly, the lighting of the environment needs to be uniform.	Virtual interactive photo taking software	1 projector or monitor or LED screen 2 Windows compute 3 speaker& hdmi cable 4 Canon digital camera such as 700D 5 Light kit 6 Green background cloth	1000		camera mode requires high background lighting and is a little harder to install. Background players can be replaced by themselves, and after taking photos will generate a qr code, the phone can be downloaded by scanning the code.
swap face taking photo wall	Place the player's face on the virtual character, as if you had become that character yourself. The entire background and virtual characters can be replaced to better match the photos of the site.	1 replace face software 2 USB camera	1 projector or LED screen 2 Infrared touch screen all in one 3 hdmi cable	1000		This product must be modified in order to adapt to your scenario. This price is a reference price, and the final price depends on the difficulty of modification.
AR FaceSwipe kinect module	The game is a real-time FaceMe Clips Starring You. When a person walks into the sensing area, the animal or other preset images will cover the person's face and appear on the screen. Moving with the person, we can use gestures to change other images, or wave to take photos and share them with friends through the qr code.	1 kinect2 camera sensor 2 Somatosensory AR FaceSwipe games	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		A person walking within 3 meters of the screen will produce a shadow. The system support up to 6 people interacting. The sensor needs to be placed below 1.5 meters height.
AR big screen game	Real pictures are obtained through the camera and virtual pictures are combined to present a more realistic virtual scene. This AR is built with 19 virtual scenes playing in a loop, including dinosaurs, dolphins, animals, and interactive games as cut fruit.	1 kinect2 camera sensor 2 Somatosensory AR game included 19 scences	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		This product is very suitable for attracting popularity!
comic portrait	When the person stands in the sensing area, the portrait is engraved, which is used to replace the cartoon character in the comic book. When the cartoon character does something, the player does the same thing, and then the picture is taken. After taking pictures of several comics in succession, the final result is a complete cartoon.	1 kinect2 camera sensor 2 comic portrait Interactive game	1 projector or monitor or LED screen or Vertical display 2 Host compute 3 hdmi cable 4 speaker optional	1000		A person walking within 3 meters of the screen will appear portrait. The system does not limit the number of people interacting. The sensor needs to be placed below 1.5 meters height.
human shadow Interactive	By default, the screen displays pictures and videos. When the person walks up to the screen, the one's shadow will be projected onto the screen, and another image will be displayed, which can be changed by yourself. People's shadows	1 kinect2 camera sensor 2 Shuman shadow Interactive game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		A person walking within 2 meters of the screen will produce a shadow. Players need to experience one after another. The sensor needs to be placed below 1.5 meters height.
Shadow dance	People stand in front of the screen, the screen will appear the cool particles of the shadow of a person, what the person do, the shadow will follow the person to do the same action. And as the amplitude of the dance increases, due to the inertia of the particles,	1 kinect2 camera sensor 2 Shadow dance Interactive game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		A person walking within 3 meters of the screen will produce a shadow. The system does not limit the number of people interacting. The sensor needs to be placed below 1.5 meters height.
The wings of an angel	When the person stands in the sensing area, an angel appears on the screen to follow the person's actions. When the player waves his arm, the angel also waves his wings.	1 kinect2 camera sensor 2 Shadow dance Interactive game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		A person walking within 3 meters of the screen will produce a shadow. The system can support up to four people playing at the same time. The sensor needs to be placed below 1.5 meters height.

oil painting Interaction	The photos are digitally processed and turned into oil molecules. When a person passes in front of the painting, it's as if the molecules of the painting are stirred, and then scattered. When people walk by, after a period of time	1 kinect2 camera sensor 2 oil painting game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		it Can put more than one photo, will automatically switch. A person walking within 3 meters of the screen will produce a shadow. The system does not limit the number of people interacting. The sensor needs to be placed below 1.5 meters height.
fantastic mirror motion sensing game	This game captures camera images for interesting transformations, and is real-time. Such as make people fat, thin and so on. You can switch effects through gestures, it's included 24 effects, and those you find interesting can be taken away by taking photos and	1 kinect2 camera sensor 2 fantastic mirror game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		You can choose to play the specified magic mirror effects. A person walking within 3 meters of the screen will produce a shadow. The system does not limit the number of people interacting. The sensor needs to be placed below 1.5 meters height.
3D virtual changing clothes use kinect camera	This is a magic mirror, when people walk in, will automatically give people to put on virtual clothes, and can partially adjust the position and size of clothes, feel appropriate can also take photos through the two-	1 kinect2 camera sensor 2 changing clothes game	1 projector or vertical monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		We can customize all kinds of 3D clothes. When the person moves, the clothes will follow the person to shake together, very realistic. kinect is installed below 1.5 meters, it is triggered 2 meters from the sensor.
kinect game						
Jump Game	This game sense the force of the human jump to move forward in the virtual foothold, there are vertical and horizontal two directions of the scene game can choose. In the process of game, there are various props and advertising signs	1 kinect2 camera sensor 2 Horizontal jump game or Vertical jump game (only choose one)	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The background and LOGO can be configured by yourselves. for single screen, size is less than 5m, 2 projection blended is supported! If there is any modification, the price needs to be recalculated
planet jump Game	The planet is constantly rotating, players have to jump at the right time, so as not to be thrown down, in the process of jumping, you can also touch the red envelope, which has a prize.	1 kinect2 camera sensor 2 planet jump game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The background, gift in a red envelope, and LOGO can be configured by yourselves. for single screen, size is less than 5m, 2 projection blended is supported! If there is any modification, the price needs to be recalculated
Run Game	Running games are played by sensing how fast or slow the player is running. It can be played by two or four players, or by a single player. It can also bring the player into the game as the role. Buyers can choose one of the three ways to play the	1 kinect2 camera sensor 2 running game (only choose one from the three)	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The background, the role, and the LOGO can all be changed to suit your application. for single screen, size is less than 5m, 2 projection blended is supported! If there is any modification, the price needs to be recalculated
fly Game	The player controls the direction of the plane through the balance of the arms, and controls the rise and fall of the plane by leaning forward and backward. The plane needs to go through the obstacles without any collision	1 kinect2 camera sensor 2 fly game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The background, the role, and the LOGO can all be changed to suit your application. for single screen, size is less than 5m, 2 projection blended is supported! If there is any modification, the price needs to be recalculated
pose Game	The role controlled by the player will move forward automatically, but there are various hollow walls in the way, the player needs to make a good posture, in order to pass through, the system will score according to your posture	1 kinect2 camera sensor 2 pose game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		Posture, wall style, and background can all be changed. for single screen, size is less than 5m, 2 projection blended is supported! If there is any modification, the price needs to be recalculated
role Play	The player can play a virtual role, and when the experienter does something, the virtual role will follow the player to do the same action.	1 kinect2 camera sensor 2 role Play game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The background, the role, and the LOGO can all be changed to suit your application. Up to six people can interact at the same time. for single screen, size is less than 5m, 2 projection blended is supported! If there is any modification, the price needs to be recalculated
Gluttonous Snake	The player can play a virtual role, and when the experienter does something, the virtual player acts as the head of the snake and uses gestures to control its movement. There will be fruit and other monsters blocking the road, role will	1 kinect2 camera sensor 2 Snake game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		Fruit, monster, background can be replaced with other images. Up to six people can interact at the same time. for single screen, size is less than 5m, 2 projection blended is supported! If there is any modification, the price needs to be recalculated

Water & fire	The two players play the roles of water and fire, and when they gesture towards each other, the particles of water and fire merge. there are 5 forms by default	1 kinect2 camera sensor 2 Water & fire game with 5 sence default	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The initial form of water and fire can be changed. for single screen,size is less than 5m,2 projection blended is supported! Can support two people to play at the same time
AR seabed hit goods	The player is now smaller, standing on the seabed, and can send out attack waves with both hands to hit floating goods and props.	1 kinect2 camera sensor 2 AR seabed game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The style of items can be replaced, can be replaced by the promotion of goods, background pictures can also be replaced. If there is any modification, the price needs to be recalculated Can support four people to play at the same time
Magic fairy	At this moment, you are a fairy in the deep forest, can launch magic ball, can knock the clouds, to see if there is treasures.You can also play with the jade rabbit to see how many rabbits you can catch.	1 kinect2 camera sensor 2 Magic fairy game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		if there is Green background will be more perfect! If there is any modification, the price needs to be recalculated Can support four people to play at the same time
Cartoon wave	Cartoon characters on the screen also emit light waves when the player stands in the sensing area and waves with their hands.All cartoon characters can be replaced with other cartoon characters.	1 kinect2 camera sensor 2 oil painting game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		Cartoon roles can be replaced The system does not limit the number of people interacting. The sensor needs to be placed below 1.5 meters height.
Virtual dance interaction	Players dance with the animation model in the game, and the system will judge the player's dance posture according to whether it is good or bad, and finally give a score.The game supports customized dance movements.	1 kinect2 camera sensor 2 Magic fairy game	1 projector or monitor or LED screen 2 Host compute 3 hdmi cable 4 speaker optional	1000		The game supports customized dance movements and animation model. If there is any modification, the price needs to be recalculated Can support four people to play at the same time
inertive RGB Lamp						
Light following system	The light on the side of the experienter will illuminate different colors or different patterns, and it will always follow the experienter. Wherever the experienter goes, the pattern will go.Support point light, digital tube, line lamp, flexible lamp band.	1 15M radar sensor with Power adapter 2 interactive software 4 Light display system 5 Lighting control system	1 point light or digital tube or line lamp or flexible lamp band. 2 mini I5 compute 3 hdmi cable 4 Light controller 5 optional speaker	4000		The final price is determined by the difficulty of the custom pattern and the length of the interaction.
Lamp Touch system	By touching the lamp on the wall, it can be automatically lit according to the track of touch.Also has the light random flicker mode, flaps to the corresponding light, may add points.	1 7M radar sensor with Power adapter 2 interactive software 3 Light Touch Game 4 Lighting control system	1 point light 2 mini I5 compute 3 hdmi cable 4 Light controller 5 optional speaker	2000		The final price is determined by the interactive content and the interactive area.
somatosensory light system	The experienter stands in the sensing area and changes the light's brightness and color by waving his or her hand. After the light changes, a specific pattern can be formed	1 kinect2 camera sensor 2 AR light Game 3 Lighting control system	1 point light 2 Host compute 3 hdmi cable 4 Light controller 5 optional speaker	2000		The final price is determined by the interactive content and the interactive area.
